

Installation Guide for Smartphone APK: How to Use MoveaTV Remote Application on an Android Phone

WHAT YOU NEED

- The latest Evaluation Kit installed on a Nexus 10
- A smartphone with at least Android 4.0

HOW TO USE THE DEVICE

On the Nexus 10 Side:

- Get your Nexus 10 IP
 - Open **Settings** application
 - Choose **WIFI**
 - Choose **Connected Network**
- Open the **Configurator** Application
 - Choose **SmartMotion Server**
 - Select **Smartphone UDP** as device

On the PC Side

- Find your computer IP
 - Open Network and Sharing Center by clicking the **Start button**, clicking **Control Panel**, clicking **Network and Internet**, and then clicking **Network and Sharing Center**.
 - Under **Connection**, click **View status**.
 - Click **Details**.
 - or
 - Click the **Start** menu button.
 - Type cmd in the search. A command prompt window launches on the desktop.
 - In this command window, type ipconfig.
 - The IP Address is the **IPv4 Address** field.
- Start your Evaluation Kit
- In the settings window (available on the top right corner), select **Smartphone UDP** device.
- Click on the OK button to leave this window and apply the new configuration

Install the Application on the Phone:

- Download the application and install it on your smartphone

CONNECT USING WIFI NETWORK

- Connect your phone and your nexus 10 to the same network
- Open the MoveaTV remote application and go to settings (press the 3 dots on the bottom-right corner and then **settings**)
- Go to the **IP** setting and input your nexus 10 IP here
- If you are using a Smartphone with a Movea custom ROM v1 (without LibSensors integration), uncheck the Use Native Sensors setting
- Go back to app main view
- Press again the 3 dots on the bottom-right corner and then **start**
- You should see a message displaying that the sensors are sent through UDP to your nexus 10 IP address, the cursor should then move on your screen

CONNECT USING HOTSPOT

On Your Phone

1. Settings > Wireless & Networks > More > Tethering and Portable Hotspot
2. Enable Portable Wi-Fi Hotspot
3. Remember the network's name and password (you can change this name with the tab Set up Wi-Fi hotspot)

On Your Tablet Device

1. Settings > Wireless & networks
2. Enable Wi-Fi and connect to the network you created on your phone device.
3. Then click on this network, a pop-up window appears. Remember the IP address, you need it for the MoveaTVRemote app set up on your phone.

On Your Phone:

1. Launch MoveaTVRemote app then click on the icon "... " at the bottom right of your screen > Settings > Address. Paste the IP address you recovered from the tablet.
2. Return to the app main screen and click again on the icon "... " > START.
3. If this works, you will see a pop-up window saying "Continuous sending ON " + your IP address.

On Your Phone:

1. To stop the remote click on the icon "... " > Stop
2. Click a pop-up window says "Sending Off"
